

They say a “picture is worth a thousand words”

Well here are a few words to go with the pictures that show why Marlon’s Jons are more stable, substantially more carrying capacity, and are economical to use as they need less hp to get on plane due to their bottom width.

	Marlon SP10	Competitors 10	<u>Marlon Benefit</u>
Max. Person	3	2	1 more person
Max. Weight Capacity	434lbs.	180lbs.	254lbs. more
Bottom Width	49”	32”	17” more than 1.5 times wider
Beam	55”	48”	7” wider
Side Depth	17”	16”	1” deeper
Ribs	5	2	3 more ribs for strength
HP Rating	5hp	3hp	2 more horses
Approx. Hull Weight	87lbs.	80lbs.	7 more lbs. you know why

Note; Marlon Ratings are from Transport Canada, Competitors are from US Coast Guard which tend to rate boats for more capacity and hp than Transport Canada. Competitor’s boat did not have a Transport Canada decal in it.
